VISION

To be the leading Engineering and Construction Company in Uganda and beyond renowned for our working methodologies and human resource capabilities.

OUR MISSION

Our mission is to deliver value to our shareholders and customers by providing engineering services, supplies, construction, operation and management of infrastructure, industrial and energy projects

OUR OBJECTIVES

- To execute the construction infrastructural projects and get hold of them ready for operation
- To deliver integrated engineering solutions for highly complex projects
- To ensure quality and timely deliveries of supplies to our clients
- To provide high quality and timely services to our clients at competitive rates thereby adding value to our clients` Business goals and consequently being recognized as trusted partners in the country.

WHAT WE DO

- Civil Engineering works
- Road construction
- Hydro power development and construction
- Supply of construction materials
- Maintenance Services of different electrical / mechanical devices and machines
- Telecommunications installations
- General supplies among many more others.
- Undertake Engineering feasibility studies and design for various infrastructural projects, project management, monitoring and evaluations

CIVIL ENGINEERING WORKS

Our civil engineering works are centered on Building and Construction services which include; Architectural drawings and designs, site layouts, site grading and excavations, earthworks, pavement evaluation and design, soil erosion and sediment control plans, drainage structures design, water and sewer system plans, storm management and many more other civil engineering services.

Sultan Engineering and Construction Ltd adheres to professional building and Construction standards.

The company's civil engineers offer professional guidance for roads and highway construction projects, as well as residential and commercial building constructions, and for all industrial, institutional, and mixed-use projects.

ROAD CONSTRUCTION

Our Professional engineering team brings together many talented Architects, civil, water, and environmental engineers ready to help you develop drainage plans featuring safety enhancements for pedestrian and multimodal traffic users.

They are experienced in roadway and parking lot designs. And along with traffic engineers, Sultan engineering team can effectively and efficiently offer project scoping, capacity and accident analysis in addition to providing surveying services, maintenance and protection of traffic plans, highways, utility relocations, street and site lightings, driveways and other roadways, curbs and sidewalks so that the outcomes not only provide for smooth transitions but also for economically-functional results.

HYDRO POWER DEVELOPMENT AND CONSTRUCTION

Our expertise in hydro-electric power projects include hydropower engineering experts, Environmental and social management specialists, project management specialists among others. Our team handle site selection and investigations, cost estimates, contract documents, tender evaluations, feasibility studies, project management and planning, constructions, supervision and on-site inspections.

Our team has extensive experience across fields of Engineering, geological, geotechnical, geodetical and hydrological research and analysis. The company also handles testing and quality control during construction of tunnels, dam sites and power stations.

SUPPLY OF CONSTRUCTION MATERIALS

The company deals also in supply of all building and construction materials such as bricks and concrete blocks, hardcore stones, concrete aggregates of all sizes, concrete and cement and all earth sand types in addition to wood, timber, wood paneling and mill work products that fall into this category. Additionally, we also supply all roofing materials, gutters, Sand all plumbing and insulation products. Sultan is also affiliated with a laboratory testing of the quality of construction materials like iron bars, among other products to ensure value for money. We are also a direct link to the major suppliers of these products around the country.

MAINTENANCE SERVICES OF DIFFERENT ELECTRICAL/MECHANICAL DEVICES AND MACHINES

Sultan Engineering and Construction Ltd, specializes in the maintenance and servicing of different machines and devices such as Generators of all kinds, motors, Gears and different industrial Plant machines and equipment's.

With our professional mechanical and Electrical engineers leading a team of highly skilled technicians, sultan engineering and Construction ltd provides a number of proactive maintenance solutions, emergency management, hotline ability, as well as permanent in house and outdoor manufacturing staff training.

The company is committed to providing complete service solutions by maintenance and operation, carrying out routine testing, equipment repair and spare parts supply, and offering consultancy service.

TELECOMMUNICATIONS INSTALLATIONS

At Sultan engineering and Construction ltd, we provide telecommunications services such as; construction and Rigging of telecom masts or Towers, Antennas and Feeder cables installations, Networking and Configurations, maintain and provide telephone switching equipment and telecommunications equipment such as transmitters, Microwave antennas and Providing and testing of network signals and other data from different telecom channels such as; fiber optics, microwave, radio and satellite established stations.

GENERAL SUPPLIES AMONG MANY MORE OTHERS

Among other many services, Sultan Engineering and Construction Ltd is involved in the provision and general supply of cost-effective products and services ranging from office supplies, electronic products, food commodities and accessories, and all other general merchandised products.

We focus on delivering high impact products that incorporate customized functionality to specific client's requirements. The combination of thorough process, comprehensive experience and expansive creative vision enables us to provide services and products that are innovative, usable and reliable. We serve small businesses, corporate companies, and government departments.

FEASIBILITY STUDIES AND DESIGN FOR VARIOUS INFRASTRUCTURE PROJECTS, PROJECT MANAGEMENT, PROJECT MONITORING AND EVALUATIONS

We do studies based on test work and engineering analysis, which presents enough information to determine whether or not the project should be advanced to the final engineering and production stages. Sultan Engineering and Construction Ltd has broad and deep experience in conducting feasibility studies for different infrastructural projects such as water and small hydro power plants.

COMPANY OVERVIEW

SULTAN ENGINEERING & CONSTRUCTION LIMITED (SECL) is a private limited company registered with Uganda Business Registration Services Bureau (URSB) in 2012 with the aim of providing services that includes; all Civil Engineering works, Electrical / Mechanical and Telecommunications Services, and General Supplies.

We aim at delivering integrated engineering solutions for highly complex projects and We are experts at designing, building and commissioning various infrastructural projects.

The company considers the empowerment of our human resources to be fundamental in building a permanent knowledge base. We are committed to our employees' safety and the development of the countries we work in, seeking the well-being of those communities and caring for the environment.

Sultan Engineering and Construction Ltd continuously seeks for new ways to

improve environmental performance and support the communities that host our projects, working collaboratively with different stakeholders to improve education, health, culture and social inclusion.

The company works together with local authorities, institutions and non-governmental organizations and build strong relationships among employees, customers, suppliers and surrounding communities. The company's management is responsible for sustainability in all its operations in accordance with the principles, policies and values of SECL.
